Karakteristik ASD

DSM V (APA, 2013)

A. Persistent deficits in social communication & social interaction across multiple contexts, as manifested by the following, currently or by history

1. Deficits in social-emotional reciprocity
2. Deficits in nonverbal communicative behaviors used for social interaction
3. Deficits in developing, maintaining, and understanding relationships

Karakteristik ASD

DSM V (APA, 2013)

B. Restricted, repetitive patterns of behavior, interests, or activities, as manifested by at least two of the following, currently or by history

1. Stereotyped or repetitive motor movements, use of objects, or speech
2. Insistence on sameness, inflexible adherence to routines, or ritualized patterns of verbal or nonverbal behavior
3. Highly restricted, fixated interests that are abnormal in intensity or focus
4. Hyper or hyporeactivity to sensory input or unusual interest in sensory aspects of the environment (pain, temperature, specific sounds, textures, smelling, touching, lights, movement)

Karakteristik ASD

DSM V (APA, 2013)

- C. Symptoms must be present in the early developmental period (but may not become fully manifest until social demands exceed limited capacities, or may be masked by learned strategies in later life)**

- D. Symptoms cause clinically significant impairment in social, occupational, or other important areas of current functioning**

Karakteristik ASD

DSM V (APA, 2013)

E. These disturbances are not better explained by intellectual disability (intellectual developmental disorder) or global developmental delay. Intellectual disability & ASD frequently co-occur, to make comorbidity diagnoses of ASD and intellectual disability, social communication should be below that expected for general developmental level

Karakteristik ASD

COMMUNICATION

ACTIVITIES AND INTERESTS

Karakteristik Tambahan

- Sensory disorders → over or under sensitive to sensory stimuli
- Movement disorders → eye, face, head, etc, tic's
- Intellectual functioning
- Hiperactivity –hipoactivity
- Aggresive & self-injurious

Triad of Impairments

Karakteristik Khusus (Autism Disorder)
